

UV-C Wall Mounted Air Sanitizer

CK150W

Disinfects the ambient air. Waiting rooms, meeting rooms, classrooms, offices, rooms, hotels...

Product description

The wall-mounted sanitizer disinfects the air in the room in the presence of the users.

Four levels of air flow and programmable operating time allow the unit to be adapted to different circumstances.

The air enters the unit through 10 fans and passes in front of a low pressure UV-C double tube. HEPA and activated carbon filters help to retain fine particles down to 0.1µm before the air exits.

A display shows the airflow rate and timer. The whole unit is controlled by the remote control.

Features

- Disinfects the air in the presence of users.
- No UV radiation outside the unit.
- Start-up and adjustment by remote control.
- Programming of the operating time.
- Selection of 4 air flow rates :
 - 170 / 235 / 300 / 450 m3/h
- Maintenance and accessibility:
 - HEPA filter by 6 screws.
 - Activated carbon filter and double-tube by 10 screws.
- Power supply 110V / 220V.
- Wall mounting by 2 screws.

	CK150W
Dimension	41,5 × 86 × 5 cm
Power	235 Watts
Voltage	110V - 220V
Volume of action	< 100 m ³
Treated air flow rate	170 / 235 / 300 / 450 m ³ /h
Noise	<55 db(A)
Lifetime of the tube	9000H
Weight	11 kg
