

Mobile UV decontamination

UV platform for disinfection of large areas

CK1000-UV

Product description

This ultra powerful device on wheels emits UV-C rays for a disinfecting action without human presence. It destroys viruses, bacteria, molds and other germs.

The mobile UV-C decontamination platform destroys viruses, bacteria and spores through the action of ultraviolet light. UVC with wavelengths of 254 nanometers (nm) destroys organisms.

This device must operate outside of any animal or human presence. Potted or cut plants must be covered or moved. A motion sensor interrupts the lighting if motion is detected.

Features

- Triggering by button.
- 12 seconds before lighting up the tubes, delay confirmed by beeps
- Several programs between 10 mn and 120 mn of lighting are enough according to the size of the room.
- A timer allows you to choose the duration of the operation
- Motion detector
- 220V power supply

	UV-J-R
UV-C wavelength	253.7 nm
Processed air volume	30-150
Timer	0 > 2 h
Dimension	120 × 100 × 120 cm
Voltage	220V
Power	1000 W
Lifetime	9000H
