

UV-C booster bulb

U10-60/U10-80

360° disinfection on tripod or suspended

Product Description

The UV-C bulb is easy to install and move around, hanging or on a tripod. This UV-C (ultraviolet) light destroys viruses, bacteria and other germs.

A remote control allows the remote lighting, as well as the adjustment of the duration. An infrared and microwave motion detector stops the operation if a presence is detected. Audible beeps warn of re-ignition.

Features

- 20 s delay before switching on to move away from the UV field
- Delay from 30 mn to 2 h
- Infrared remote control
- Microwave detection at 6 m: switch off when approaching and switch on again if moving away
- If the sensor malfunctions, the luminaire remains off
- Suspended or on tripod (options)

U10-60/U10-80

UV-C Wavelength	254 nm
Base	E27
Lifetime	9 000 h
Dimension	94 × 322 / 422 mm
Voltage	220 V
Power consumption	60 W / 80 W
Timer	30 - 60 - 90 - 120 mn
