

UV C linear luminaire

Industrial disinfection

U12-40 / U12-60 / U12-80

Product description

This linear UV-C (ultraviolet) light decontamination luminaire destroys viruses, bacteria and germs in the air and on surfaces.

Its presence detector, its time delay at the ignition and the re-ignition are completed by sound beeps to make it completely safe to use.

The linear can be joined to others of equal or different lengths to adapt to your environment.

Features

- 20 s delay before switching on.
- Delay from 30mn to 2h in 30mn steps.
- Infrared remote control.
- Infra-red detection: switch off when approaching and switch on when moving away
- The lighting is not done as long as a presence is detected
- If the sensor malfunctions, the light remains off.
- 2 UV-C tubes
- Extension by abutments.
- Surface mounted, wall mounted or suspended according to option.

U12-40/ U12-60/ U12-80

UV-C wavelength	254 nm
Base	G5
Timer	30 - 60 - 90- 120 mn
Dimension	704 / 1009 / 1313 × 67 × 54 mm
Voltage	220V
Power consumption	40W / 60W / 80W
Lifetime	9000H
